DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 27, 2008 has been entered.

The outstanding rejection under 35 USC 103(a) is withdrawn in view of the amendments filed February 27, 2008 that the claims are now drawn to the method of contraception by using the thio-oxindole derivative compounds with R5 being a 5-member ring with a CN moiety in it.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2-7, 9, 14, 44-55 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3, 5, and 12 of U.S. Patent No. 6,946,454 ('454) and US 6,331,562 ('562).

'454 teaches the elected compound and the compounds of formula (I) with R5 can be a 5-member ring with CN as one of the substituents as useful in inducing contraception (See claims 1, 3, 5, and 12, for example).

'562 teaches the compounds taught therein, which are SERMs, as useful in oral contraception (See col. 21, lines 62-63 for example).

The references do not expressly teach the compounds of formula (I) combining with compounds of '562 in a method of inducing contraception.

It would have been obvious to one of ordinary skill in the art at the time of invention to employ both the compounds of '454 and that of '562 in a method of inducing contraception.

One of ordinary skill in the art would have been motivated to employ both the compounds of '454 and that of '562 in a method of inducing contraception. Concomitantly employing two agents, which are known to be useful for contraception individually, in a method useful for the very same purpose is *prima facie* obvious (See *In re Kerkhoven* 205 USPQ 1069 (CCPA 1980)).
